MAZEN TAMER ELSAYED AHMED ELADAWY

Computer Science Undergraduate | AI and Data Science Trainee at DEPI

6th of October, Egypt | +20 111 683 0405 | mazentamerelsay@gmail.com

Portfolio | **GitHub** | **LinkedIn**

PROFESSIONAL SUMMARY

Computer Science undergraduate with a 3.55/4.00 GPA, currently training in artificial intelligence and data science through the Digital Egypt Pioneers Initiative (DEPI). Seven source-verified projects span C++ algorithms, C#/.NET domain modeling, PHP/MySQL applications, JavaScript systems, and low-level MIPS programming. Built and deployed an evidence-backed React and TypeScript portfolio that links technical claims to public code. Seeking a software engineering, full-stack, or data-focused internship where careful problem solving, documentation, and clear communication create value.

TECHNICAL SKILLS

Languages: C++, C#, JavaScript, TypeScript, PHP, SQL, MIPS Assembly
Web and platforms: React, HTML, CSS, MySQL, PDO, Chart.js, .NET 10, .NET Framework, Windows Forms, GDI+
Engineering: OOP, data structures, algorithms, binary I/O, bit packing, file persistence, generics, collections, events and delegates, state machines, role-based access control, CSRF protection
Tools: Git, GitHub, Vite, Vitest, Playwright, Visual Studio, MARS

SELECTED PROJECTS

Evidence-Backed Software Engineering Portfolio — **React | TypeScript | Vite**

- Built and deployed a responsive GitHub Pages portfolio presenting seven projects through contribution, technical decision, verified result, limitation, and commit-pinned source evidence.
- Added validation, unit/component tests, and a browser smoke test so identity, project evidence, contact actions, and the approved resume are checked before release.

LeBaladna Survey Helper — **PHP | MySQL | JavaScript**

- Built role-based admin, analyst, and member workflows for survey authoring, participant assignment, responses, Chart.js analytics, and CSV/PDF export; centralized PDO queries, role checks, CSRF verification, and session hardening.

Huffman Compression Algorithm — **C++ | Binary I/O**

- Implemented frequency analysis, compression, and decompression for TXT, BMP, WAV, and AVI inputs using Huffman trees, prefix codes, embedded reconstruction metadata, and bit-packed output.

Examination Management System — **C# | .NET 10**

- Modeled instructor/student workflows, three question types, exam state, scoring, subject-based persistence, abstract hierarchies, constrained generics, and exam-start events; verified a successful build.

CPU Scheduling Visualizer — **JavaScript | HTML | CSS**

- Implemented six scheduling algorithms with per-process waiting/turnaround metrics, result comparison, and animated process flow in a browser-native interface.

EXPERIENCE

AI and Data Science Trainee — **Present**

Digital Egypt Pioneers Initiative (DEPI)

- Completing structured training in artificial intelligence and data science, with an emphasis on practical learning and career readiness.

IGCSE O Level Mathematics Tutor — **2023 - 2024**

- Taught mathematics through structured, step-by-step explanations adapted to individual student needs, strengthening technical communication and patience.

EDUCATION

October University for Modern Sciences and Arts (MSA), Egypt — **Expected 2028**

Bachelor of Science in Computer Science | GPA: 3.55/4.00

Relevant coursework: Data Structures, Algorithms, Operating Systems, Computer Architecture, Object-Oriented Programming, Web Development, Discrete Mathematics, Linear Algebra, Calculus I and II
